MEMORANDUM

TO: Hon. Craig D. Apple
Albany County Sheriff

FROM: Laura DeGaetano, Sr. Natural Resource Planner

DATE: November 27, 2017

RE: Capital Projects

SUBJECT: Clarksville Public Safety Building Construction and Renovations amended determination

I have reviewed the documentation provided describing the subject Capital project as it relates to State Environmental Quality Review (SEQR). As I understand it the building currently housing the Sheriff's Office Law Enforcement Public Safety and Emergency Services operations located at 58 Verda Ave, is in need of renovation in order to maximize space and upgrade technology and electrical systems. This will result in a state of the art facility to allow improved services to the residents of Albany County.

The project includes two phases. Phase I includes a renovation of the interior of the existing 32,000 sq. ft. structure. Phase II will occur later in the year and includes construction of a new 15,000 sq. ft. storage structure for specialized vehicles and equipment.

Given that the Clarksville Elementary School Building is listed on the National Register of Historic Places, this full project, as proposed, requires review as a Type I action under SEQR pursuant to 6 CRR-NY 617.4 (b)(9). As such, any studies, approvals and procedures necessary to complete a review as a Type I action under SEQR must be completed prior to funding and commencement of this project.

The County realizes that pursuant to NYCRR Part 617.3(g) segmentation is only permissible under certain circumstances and when such review is no less protective of the environment. After reviewing both phases of the project it was determined that segmentation of these project phases is appropriate under SEQR for the following reasons:

- There are no environmental impacts related to Phase I, which has been determined to be a Type II action. All renovations to the existing structure will occur on the interior of the building. Therefore, there are no cumulative impacts related to this project.
- The two phases of the project have a separate purpose and occur in distinct separate geographic areas. Phase I will focus on interior renovations to the existing structure for improving communications and operations. Phase II is intended to provide additional storage for vehicles.

- The phases of the project are functionally independent and completion of Phase I does not commit the county to proceed with Phase II. The project phases are also being funded by separate contract and resolution.

As described above, Phase I including the proposed building improvements project meets the criteria established for SEQR Type II actions pursuant to 6 NYCRR 617.5 (c) subdivision (1)(2) and (25). Accordingly, this action has been determined not to have a significant impact on the environment, and as such, no procedural compliance with SEQR beyond this determination is required at this time.

Should the county proceed with implementation of Phase II of the project, it is understood that SEQR review as a Type I action will be initiated and the county will seek to establish lead agency status and coordinate the review of the project. In addition, the County will complete the Full Environmental Assessment Form and all necessary environmental reviews, municipal approvals, and other permit compliance prior to implementation.

Should you have any questions or require additional information, please feel free to call me at your convenience.

Full Environmental Assessment Form
Part 2 - Identification of Potential Project Impacts

Agency Use Only [If applicable]

Project : _____

Date : _____

Part 2 is to be completed by the lead agency. Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency and the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

Tips for completing Part 2:

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer "Yes" to a numbered question, please complete all the questions that follow in that section.
- If you answer "No" to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box "Moderate to large impact may occur."
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the "whole action".
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

Full Environmental Assessment Form
Part 3 - Evaluation of the Magnitude and Importance of Project Impacts
and
Determination of Significance

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

Reasons Supporting This Determination:

To complete this section:

- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- Attach additional sheets, as needed.

1. Impact on Land - A minimal amount of land disturbance is required to place the storage structure. A concrete pad will be placed on a level grassy area to place the 12,000 sq ft storage structure. Excavation and grading will not exceed 6 inches in depth. Minimal impact to land is expected.

7. Impact on Plants and Animals - The only area of disturbance is a grassy, mowed area adjacent to the parking lot. No unique habitat, plants or animals will be disturbed.

10. Impact on Historic and Archeological Resources - The Clarksville Elementary School which is located on the property and is currently used by the Sheriff's Department is listed on the State and National Register of Historic Places. All renovations planned to the building are on the interior. There will be no impact to the exterior. The steel storage structure to be placed adjacent to the school will be a complementary color to the historic building on site. Ground disturbance for installation of the concrete slab on which the structure will be placed will be limited to no more than six inch depth below current ground level. The project has been reviewed by NYS Office of Parks, Recreation and Historic Preservation and they have determined that the project will have No Adverse Impact upon the cultural resources in or eligible for inclusion in the State and National Register of Historic Places.

15. - Impact on Noise, Odor, and Light - Some new exterior lighting to illuminate the entrances to the new storage structure will be required. The lighting will be placed to have minimum to no impact on surrounding properties.

Determination of Significance - Type 1 and Unlisted Actions

SEQR Status: Type 1 Unlisted

Identify portions of EAF completed for this Project: Part 1 Part 2 Part 3

Upon review of the information recorded on this EAF, as noted, plus this additional support information

and considering both the magnitude and importance of each identified potential impact, it is the conclusion of the Albany County Legislature _____ as lead agency that:

A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued.

B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency:

There will, therefore, be no significant adverse impacts from the project as conditioned, and, therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.d).

C. This Project may result in one or more significant adverse impacts on the environment, and an environmental impact statement must be prepared to further assess the impact(s) and possible mitigation and to explore alternatives to avoid or reduce those impacts. Accordingly, this positive declaration is issued.
