

RETIREMENT AND STABILIZATION SAVINGS

The New York State and Local Retirement System Contribution Stabilization Program is an optional program that establishes a graded contribution rate system. If governments elect to participate, it enables them to pay a portion of annual contributions over time, leading to smoother, more predictable pension costs.

In contrast to the normal annual retirement contribution, as the Retirement System's average rates rise, the County's annual contribution under the Stabilization Program would be less than the normal contribution, since the graded rate increase is capped at one percent. When the System's average rates begin to decline, the graded rates will decline in one percent increments. Therefore, it will be possible for the System's average rates to be lower than the graded rates. In such instances, the County will pay the graded rate. Any additional contributions will first be used to pay off existing amortizations. If all amortizations have been paid, any excess will be deposited into a reserve account and will be used to offset future increases in contribution rates.

As can be seen in the chart above, our retirement system contributions are highly variable from year to year. Since 2009, our retirement system obligation had increased three fold by 2014 and now has seen its first decrease to \$22 million in 2022. Unfortunately, even though our yearly pension obligation based on salaries and contribution rates is declining, the full benefit of that decrease is offset by payments from past amortizations.

RETIREMENT AND STABILIZATION SAVINGS

According to recent trends, Albany County's pension obligation for 2022 is a projected total of \$21,642,078, of which nothing can be amortized under the original contribution stabilization program for an out of pocket expense of \$21,642,078. The 2021 bill will also contain payments totaling \$3.79 million for prior amortizations and installment payments. Albany County has taken advantage of prepaying the retirement obligation over the past three years. This totals to a savings of \$496,763 combined for the taxpayer. If trends continue, Albany County can save an additional \$120,839 during 2022 – bringing the total to \$618,602. Albany County has also paid down the amortization liability, from a high of over \$31 Million to \$10.9 Million with the inclusion of the payment from 2022 Projection.
