

# NATIONAL GRID HOMEOWNER INCENTIVES

# NATIONAL GRID BUSINESS INCENTIVES

#### • Air-source Heat Pumps (ASHP)

- Partial load heating ASHP will receive \$500 per unit
- Full load heating ASHP will receive \$1000/10,000 BTUH

#### Furnaces & Boilers

- New, high-efficiency equipment can reduce natural gas use and manage your energy costs
- Depending on the equipment's efficiency you can receive up to a \$600 rebate

#### Natural Gas Water Heaters

Save up to \$125 dollars when purchasing high efficiency equipment

# • <u>Electric Heat Pump Water Heater</u>

 You'll be able to save up to \$700 dollars with a national grid rebate

# Combination Heating and Water Heating

- You can heat your home and water without a separate water tank, all while saving energy
- You can also receive up to a \$650 dollar rebate

#### Heat Pump

 Through the NYS Clean Heat Program, incentives are available to reduce upfront costs

### • <u>High-Efficiency Natural Gas Heating Equipment</u>

 Rebates for the installation of highly efficient gas furnaces, water heaters, boilers, and controls

### Real Time Energy Management (RTEM)

 RTEM can help reduce energy use, lower carbon emissions, and improve energy benchmarking scores

#### • Compressed Air System

 If you are constructing a new facility, National Grid has a number of incentives to help make compressed air more efficient and economical

## Energy Management System (EMS)

- EMS can improve the energy efficiency of heating, ventilation, and air conditioning systems
- Continuing advances in technology have made EMS systems cost-effective for smaller facilities
